

# Lid Wiper Epitheliopathy Quiz

1. What causes dry eye?
  - a. Air conditioning and central heating
  - b. cigarette smoke and smog
  - c. use of certain medications
  - d. contact lens wear
  - e. All of the above
  
2. What does NIBUT stand for?
  - a. Neo-invasive broken up tears
  - b. Non invasive break up temperature
  - c. non invasive break up time
  - d. Non invasive break up tears
  
3. What does TTT stand for?
  - a. Third Technical Theory
  - b. Tear Thinning Time
  - c. Theoretical Tang Test
  - d. Third Tier Test
  - e. All of the above
  
4. True or False According to the article 5 tests may be used to determine dry eye problems and they are
  - a. Schirmer's test,phenol
  - b. red thread test,
  - c. tear break up time
  - d. fluorescein break up time
  - e. non invasive break up time
  
5. True or False  
The difference between a Schirmer and a Schirmer II test is that in a Schirmer II test a cotton tipped applicator is used to irritate the nasal mucosa prior to measuring tear production.
  
6. True or False  
In an FBUT what time for tear breakup is consistent with dry eyes?  
30 seconds or less.
  
7. True or False  
The precise location of the lid wiper is between the stratified columnar epithelium and the subtarsal fold.
  
8. True or False  
"floppy eyelid syndrome" usually occurs in obese women because a loose eyelid and elastic tarsus allows the upper lid to evert during sleep.
  
9. True or False  
If Lid Wiper Epitheliopathy (LWE) is determined in a contact lens wearer cessation of contact lens wear usually leads to the resolution.
  
10. True or False  
A possible explanation for a patient who exhibits typical dry eye symptoms with no clinical signs i.e. FBUT of more than 10 seconds and Schirmer value of 10mm or more is Lid Wiper Epitheliopathy (LWE)
